

Instruction to run our website database

1. Create an empty database named 'webdb'.
2. Import file 'webdb.sql' from base folder.
3. There are 396 records in total at the time of submission.

4. The access id and password are mentioned in inc/connect.inc.php. Change according to your database.
5. The project starts from 'login.php'.

LogIn Page Functionality

When go to our URL LogIn is the first page you will see. Here you will see logo of “SENSA” which contains 5 different colours which goes with our concept of “Different people have different Opinion.”

To enter our website you need a valid username and password. You can register and create on by clicking on link below LogIn button which says “Continue with email”. This will bring you to our new user registration form where you have to fill all the details to get your new username and password. If you mistakenly click on this link and you already have valid username and password for our website, you can click on link “Already a user?” to go back to Welcome form to enter your Username and Password.

By entering correct username and password you will be directed to your “Dashboard”.

Here you will see header with our logo. By clicking this from any page you will be redirected to your “Dashboard” page.

In header you will find 4 buttons

- Search Button
- Add a Question Button
- Profile Button

By clicking on Search Button you will get text input. By typing there you can search through our website.

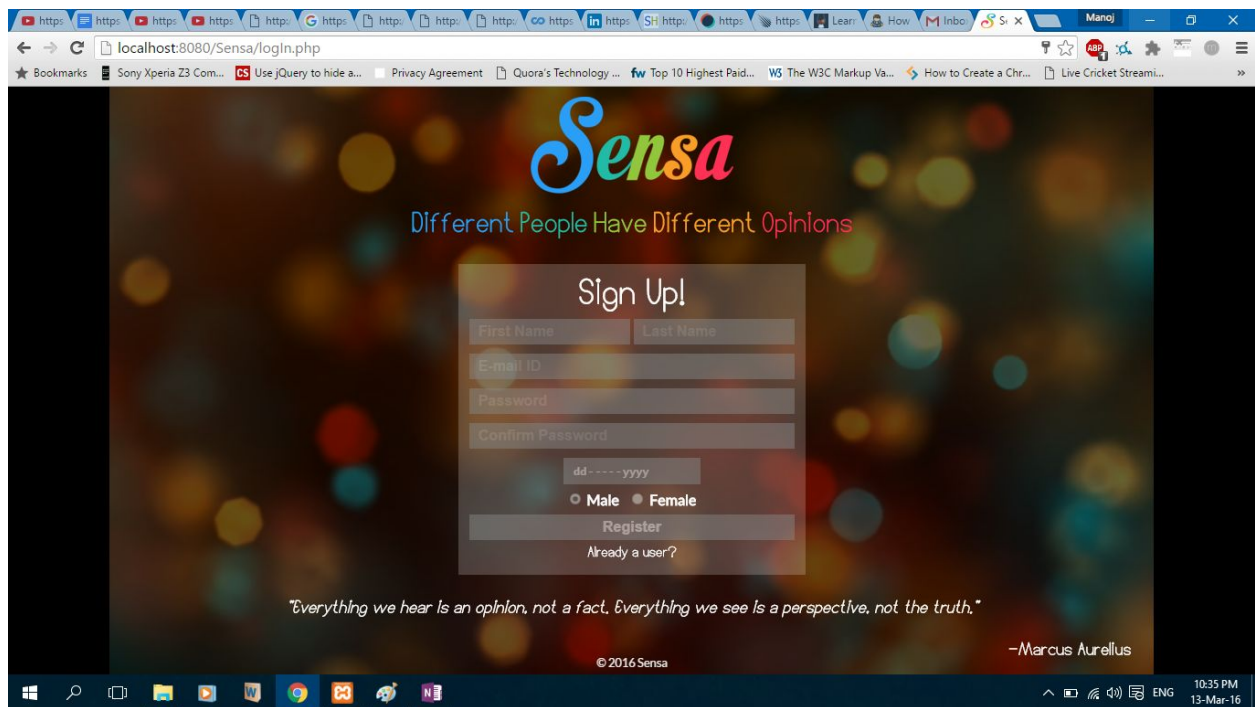

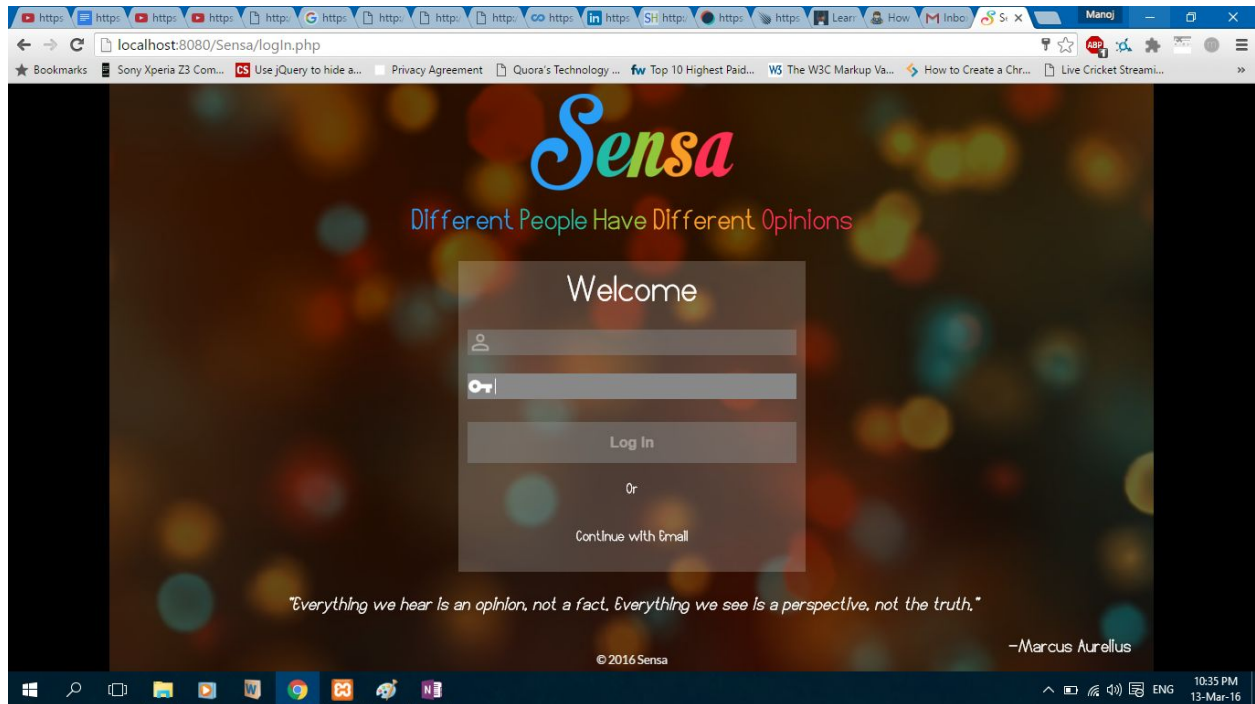

By clicking Add Button you will be redirected to Add Question page.

By hovering on Profile Button you will get two options.

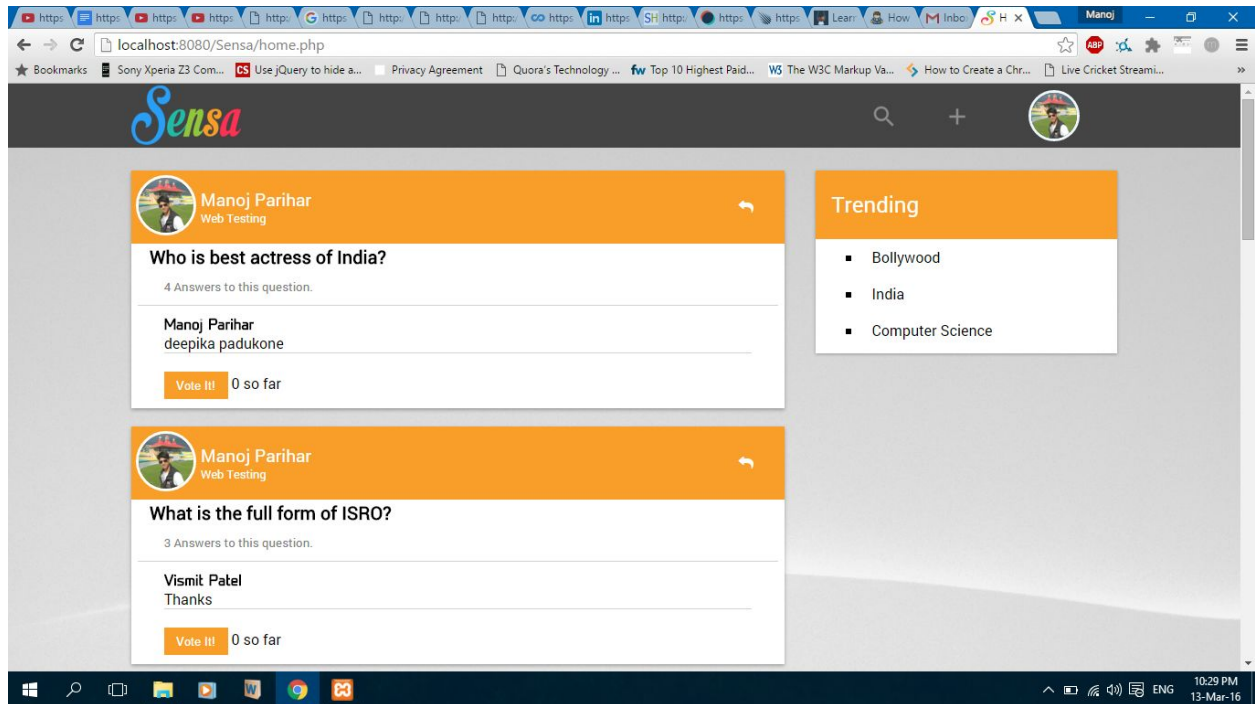

1. Profile Page
2. Log Out

By clicking on Log Out Button you can log out from our website and you will be redirected to LogIn page.

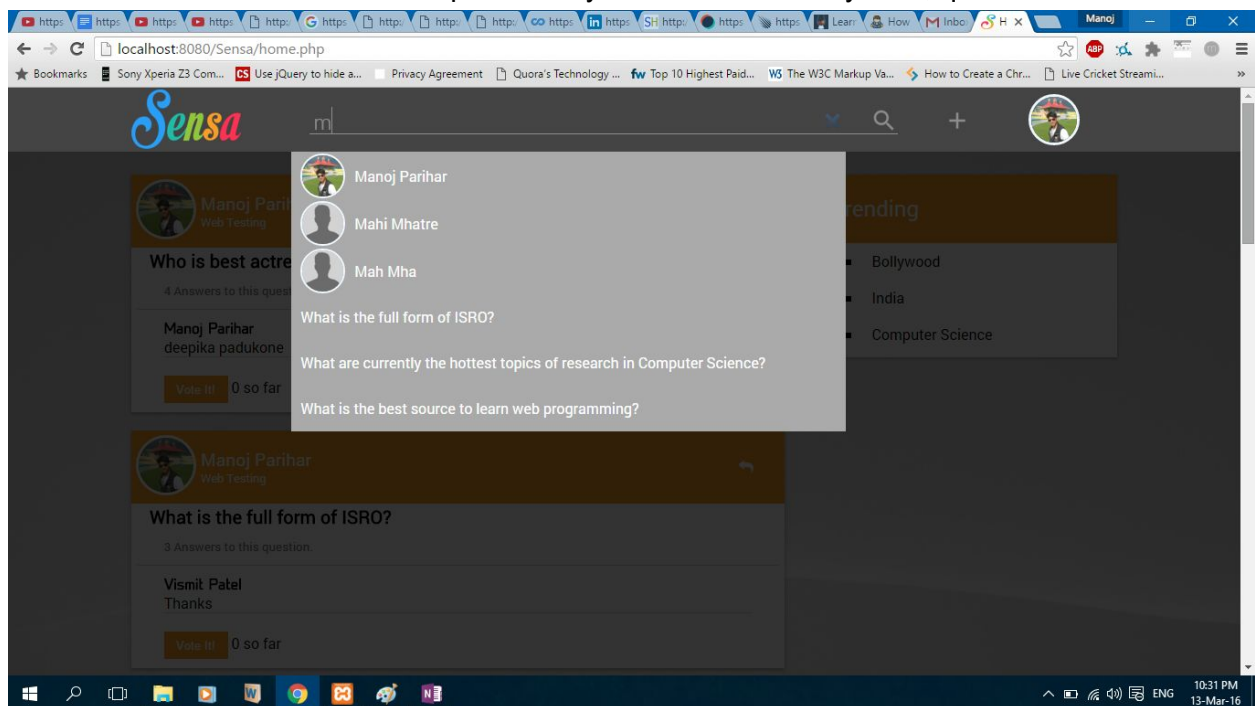

By clicking on 1st option(Profile Page) you will be redirected to your own Profile Page.

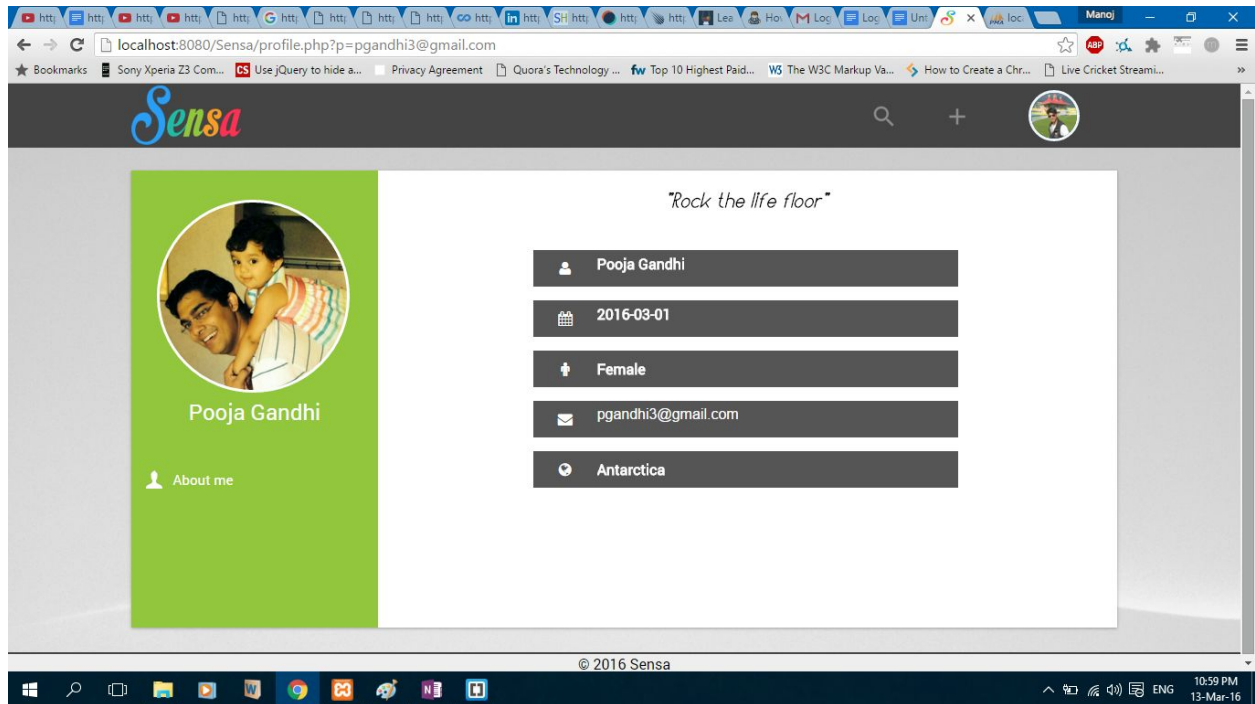

6. The test username and password is "mparihar@gmail.com", 'asd'.
7. After successful logging, it lands on the home page.

8. You can click on any question, respond to any question, upVote it, see the latest answer to any question.
9. The trending topics currently is not functional. We are thinking of it as a future enhancement.
10. The search button at the top enables you to search for any user, question.

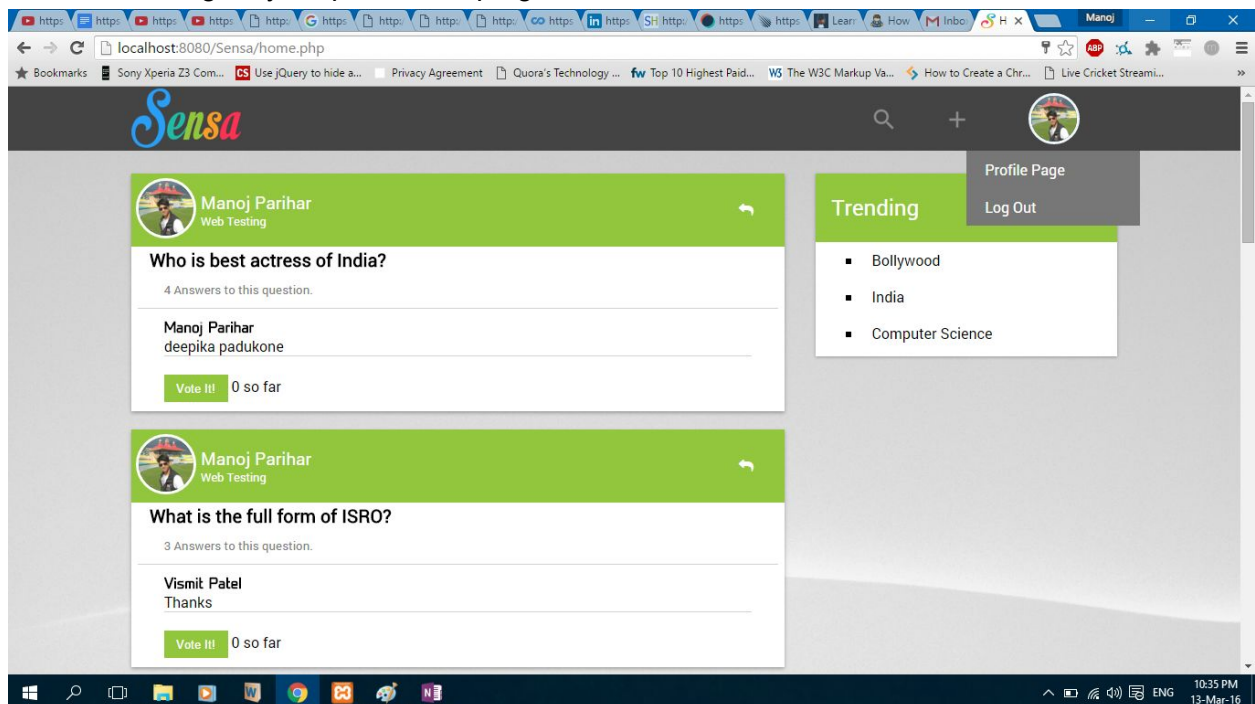

11. Clicking on the icon or question takes you to that respective page.

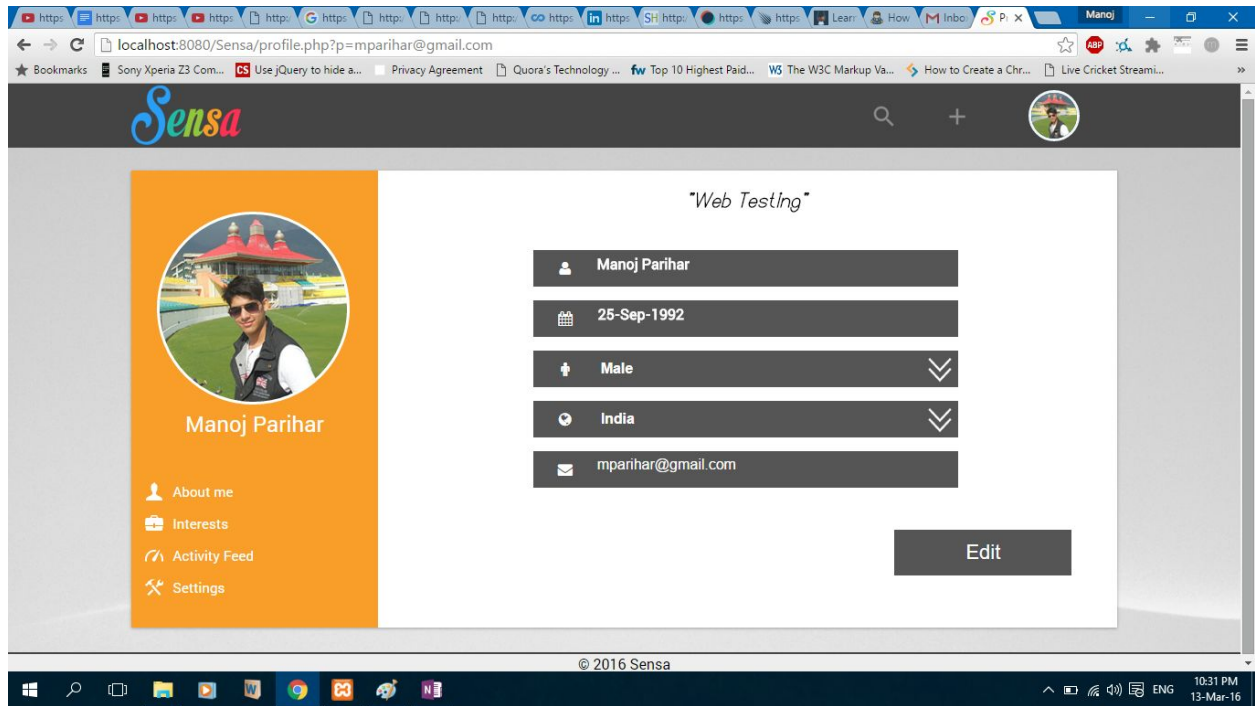

12. Clicking on any other person's profile picture takes you to their profile.

13. You can view their details.

14. Hovering on your profile at top right shows a menu.

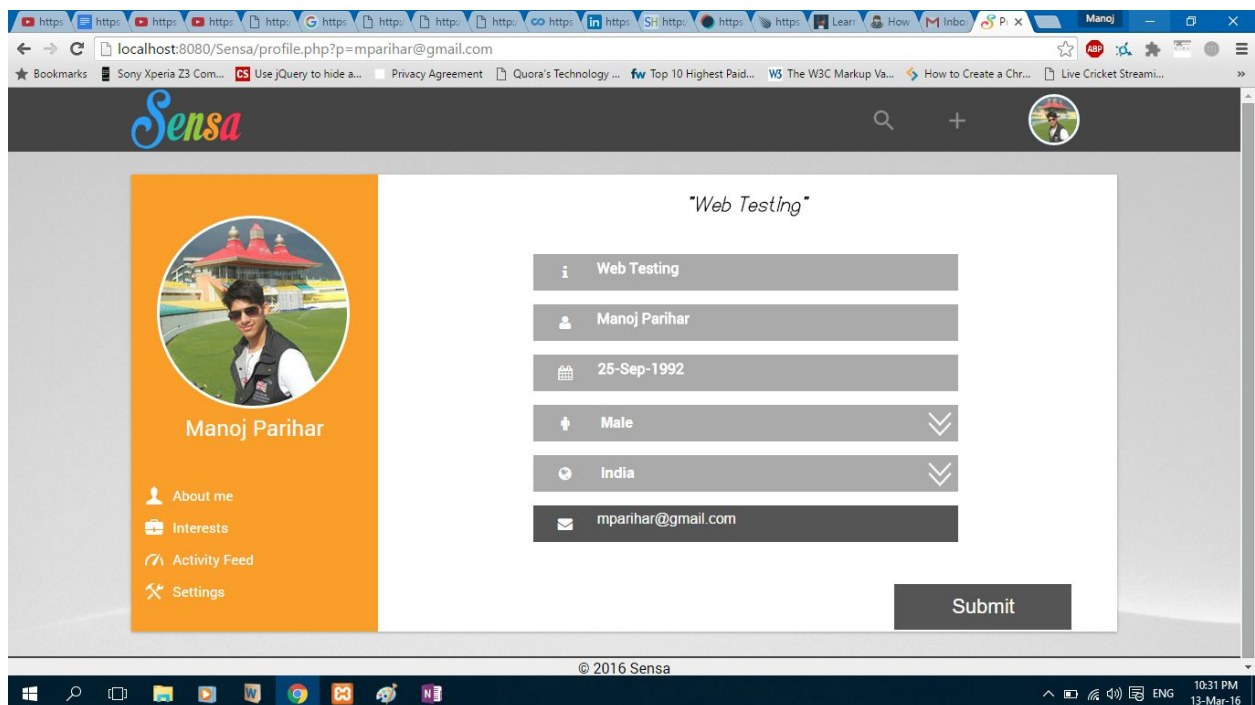

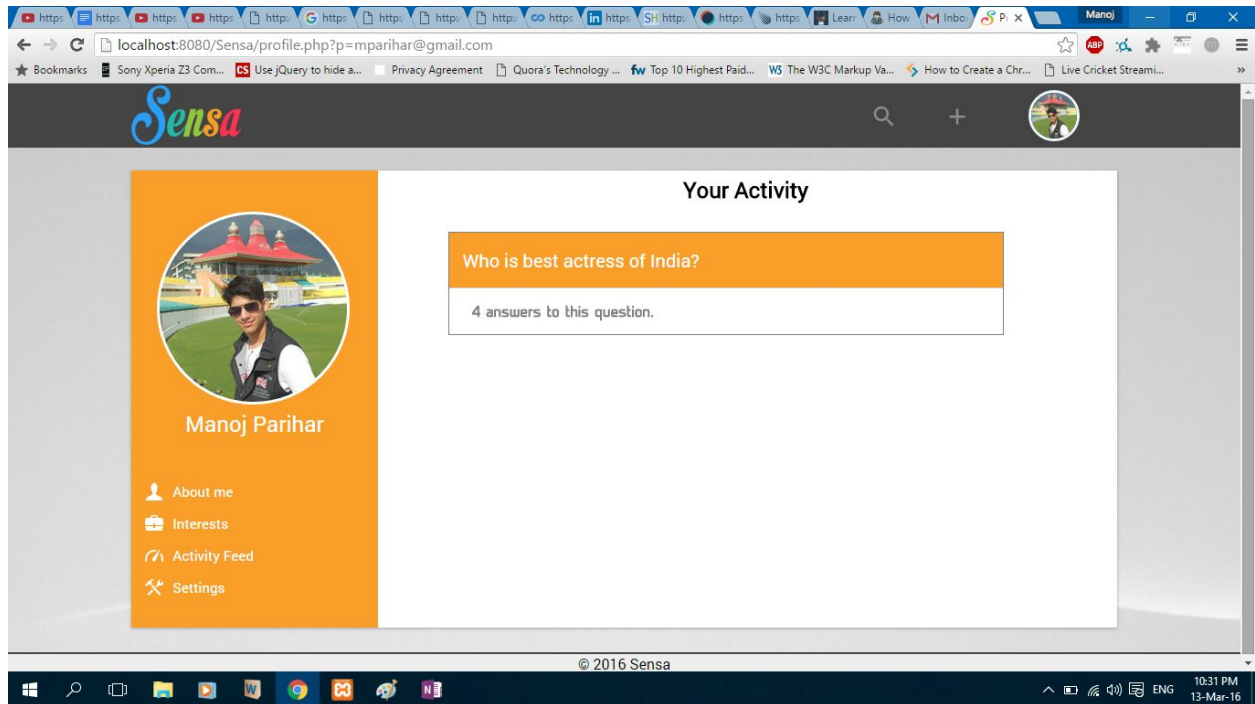

15. You can see you profile page and option to log out.

Profile Page

On clicking edit button.

Description:

1) Allows user to view his personal details such as:

- Name
- Date Of Birth
- Country
- Gender
- Phone Number
- Email id

On click of Edit button User can edit his personal details except his Email Id.

2) Enables user to change his profile picture using Upload Button

Font Awesome icons are used in input field to give a good look and feel.

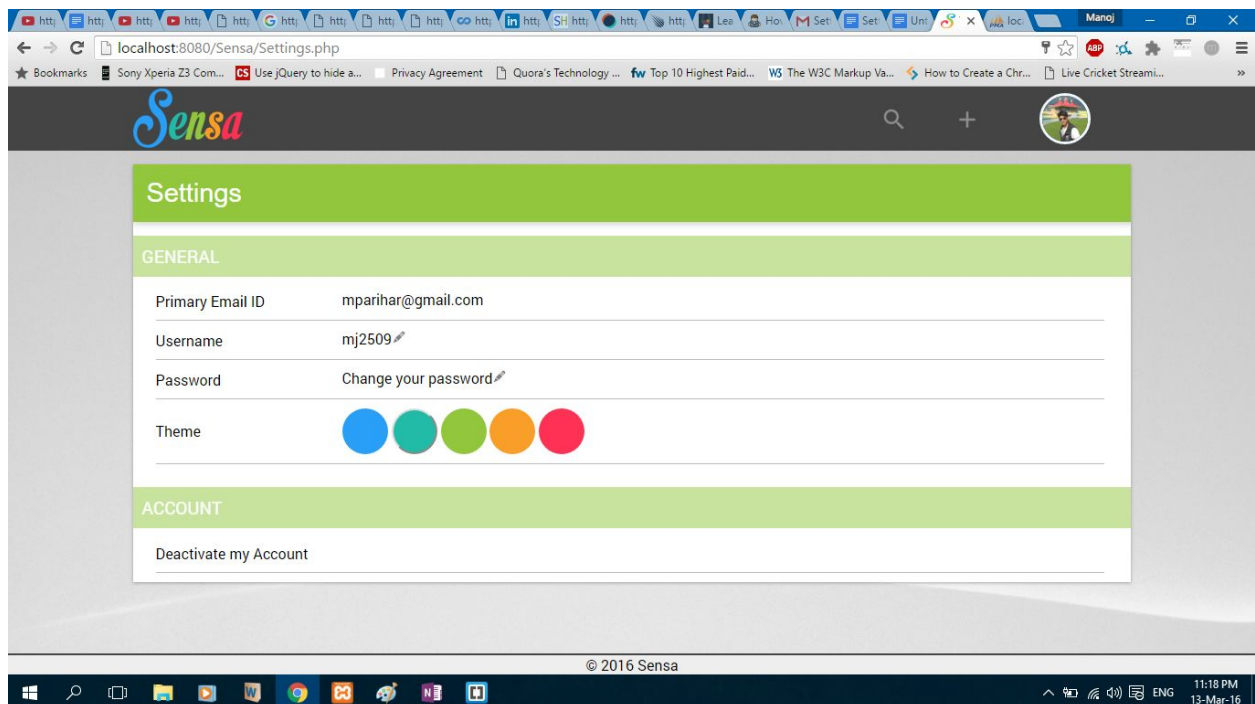

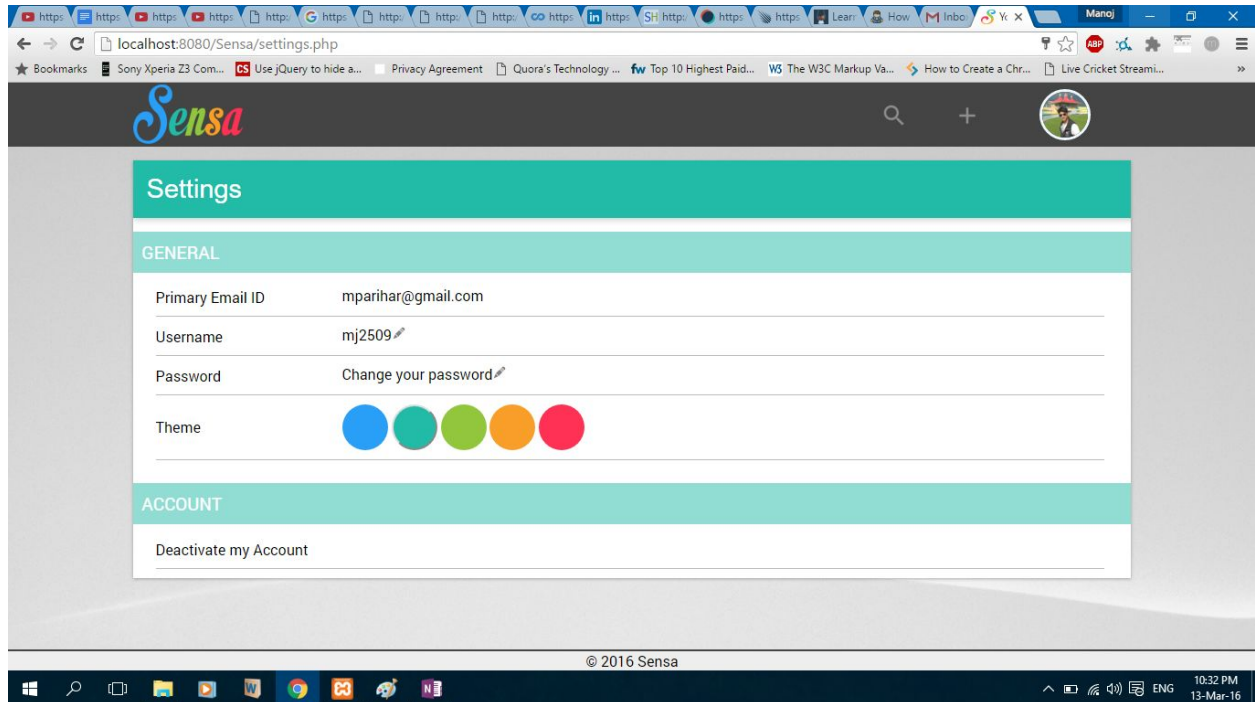

Font Awesome icons provides customised vector icons which can be used as a font family and whose font size can be changed.

3) The Navigation on the left side allows user to go to the respective pages by clicking on it. Navigation comprises of following list:-

- AboutMe- Allows user to view his details and edit it except email id.
- Activity feed - Shows a list of questions you have posted.

- Interests- User can select his interesting topics - **FUTURE ENHANCEMENT.**
- Settings- Redirects to Settings Page.

Settings Page

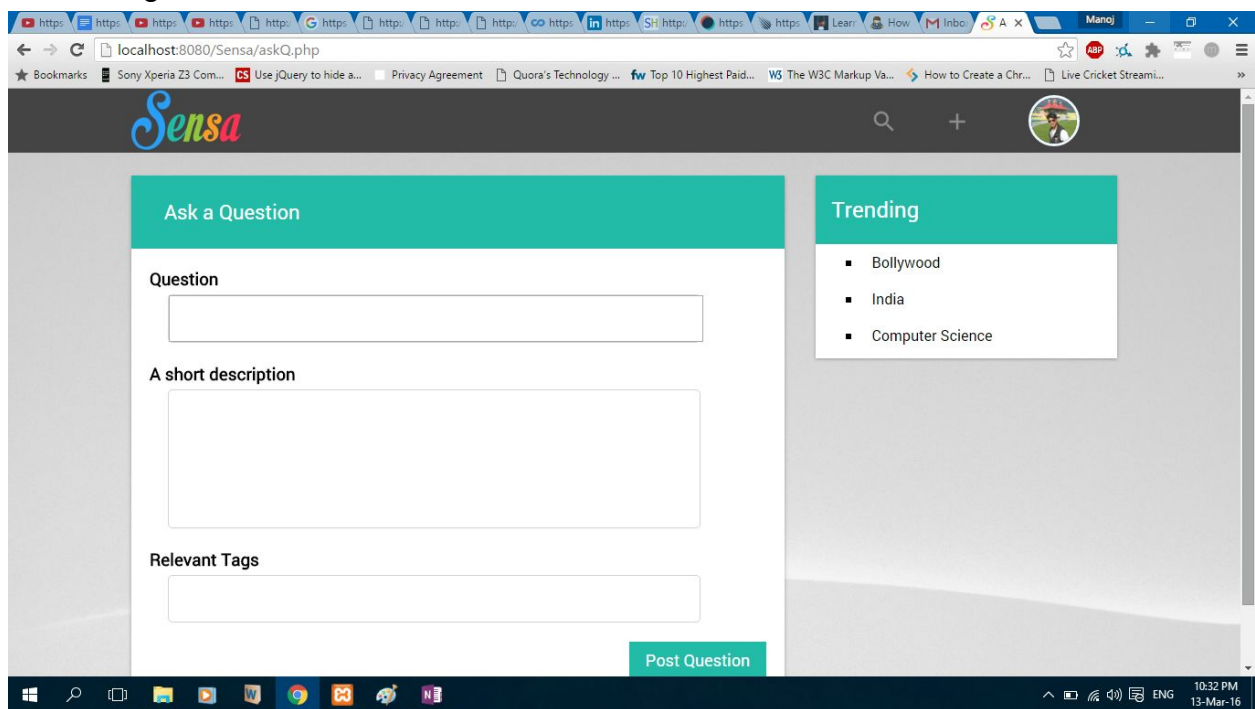

Description:

Allows user to change theme , change his password .

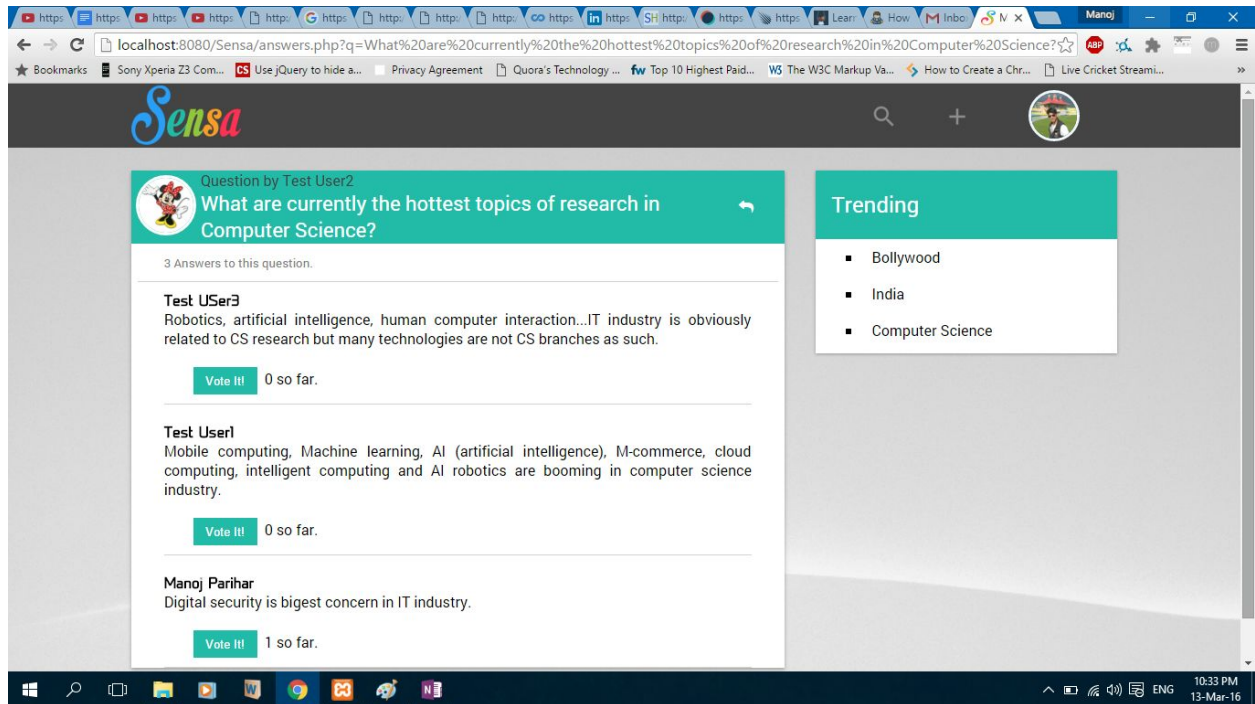

- **Change theme**- Change theme allows User to pick any of the 5 colors of the logo and keep as theme color.
- **Change Password**- User can reset his password.
- **Change Username** - User can set or change his username.

On clicking the '+' button on header.

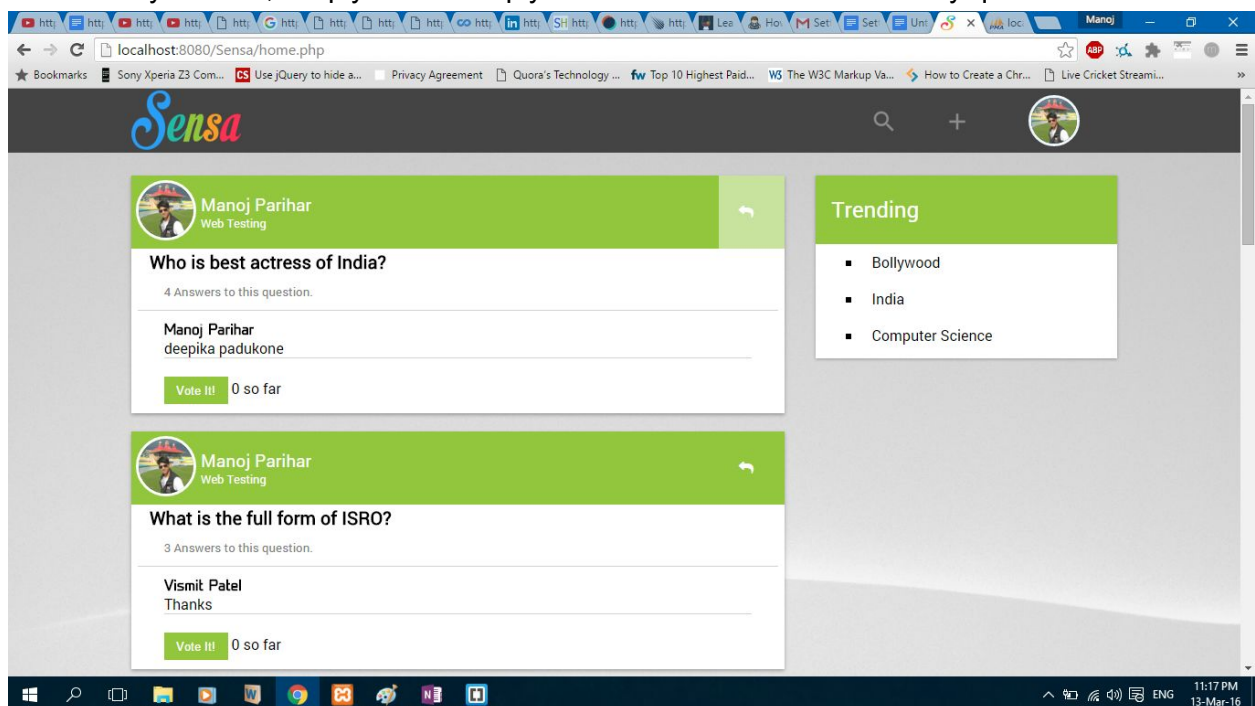

You can write and post any question, give a short description.
The relevant tags is currently not functional.

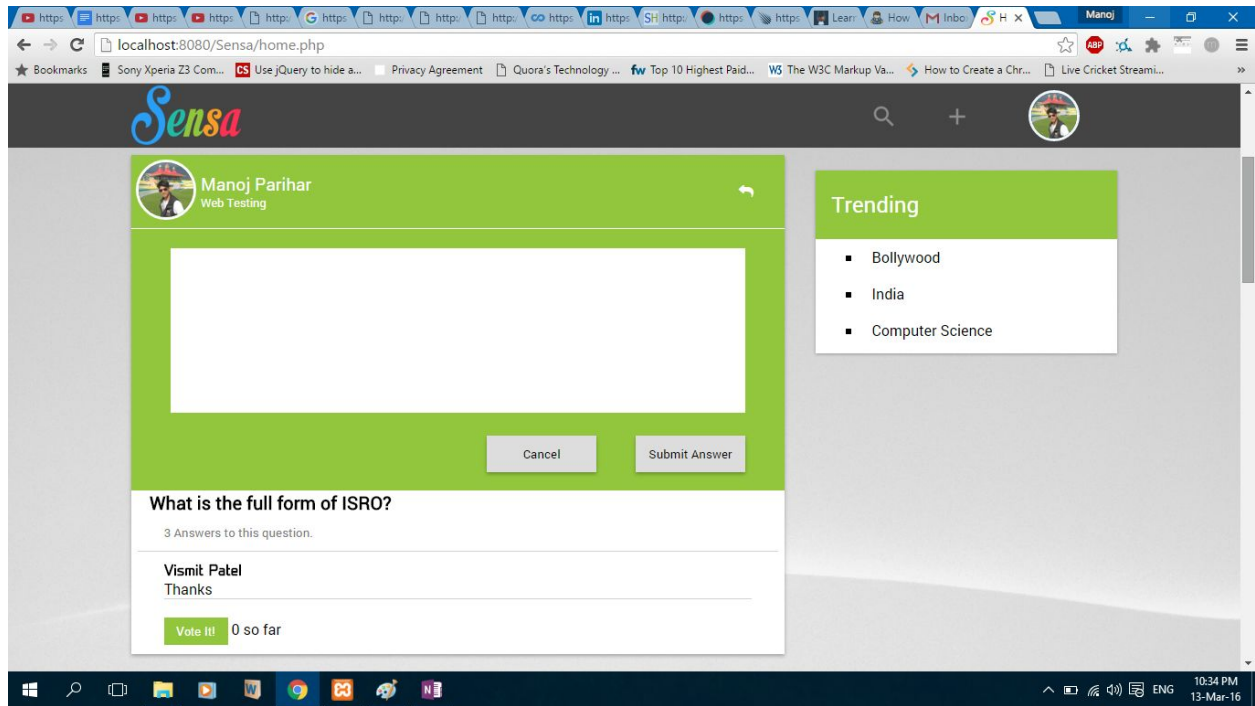

Clicking any question leads to the specific question and all the answers..

To write any answer, simply click on reply button. It's on the header of any question card.

It leads to a dynamic box where you can write and submit your answer.

Finally, to sign out, hover over your profile image, Click on logout. This takes you back to login page.
